Farmer's Harvest Companion,

AND

Country Gentleman's Assistant ;

CONTAINING

Exact and useful TABLES ready cast up ;

SHOWING

At one View, the Area or Content of any Piece of Land ;
the Expence of Workmanship of any Quantity ; and the
Value of any Number of Perches per Acre.

BEING

A NECESSARY GUIDE

FOR GENTLEMEN'S STEWARDS, LAND MEASURERS, BUYERS
and SELLERS of WOOD ; and particularly useful for FARMERS
in the Time of Harvest, and other Persons who put out Work,
by the Acre.

By THOMAS JARVIS.

The FIFTH EDITION, carefully corrected and enlarged. K

WITH

SUNDRY NEW TABLES,

By an Experienced FARMER, in the COUNTY of KENT.

SHOWING

The Expence of Threshing ; the Value of Workmanship by the
Hundred ; the sowing Corn in Drills or Furrows, and ascertain-
ing the Quantity of Seed per Acre.

CANTERBURY:

PRINTED AND SOLD BY SIMMONS AND KIRKBY.

Also by the Booksellers in Town and Country.

1790.

[PRICE TWO SHILLINGS BOUND.]

Farmer's Market Companion

Containing a full and complete list of the names of the Farmers and Merchants who are engaged in the business of supplying the City of New York with fresh produce.

Published by J. B. Lippincott & Co., 151 N. 3rd St., Philadelphia.

Entered as Second-Class Matter, May 1, 1879, under Post Office No. 100, at Philadelphia, Pa., under Act of October 3, 1878. Accepted for mailing at special rate of postage provided for in Act of October 3, 1878, authorized on July 1, 1896.

A NECESSARY GUIDE

For the selection of the best quality of produce, and for the purchase of the same at the lowest prices. It contains a full and complete list of the names of the Farmers and Merchants who are engaged in the business of supplying the City of New York with fresh produce.

BY J. B. LIPPINCOTT & CO.

151 N. 3rd St., Philadelphia.

NEW YORK: J. B. LIPPINCOTT & CO., 151 N. 3rd St., 1879.

Entered as Second-Class Matter, May 1, 1879, under Post Office No. 100, at Philadelphia, Pa., under Act of October 3, 1878. Accepted for mailing at special rate of postage provided for in Act of October 3, 1878, authorized on July 1, 1896.

PRINTED AND PUBLISHED BY J. B. LIPPINCOTT & CO., 151 N. 3rd St., Philadelphia.

A full and complete list of the names of the Farmers and Merchants who are engaged in the business of supplying the City of New York with fresh produce.

(Price two cents per copy.)

CONTENTS.

TABLE I.

PAGE.

SHEWS the Area or Content of any Cant or Piece of Land, from one Rod broad to sixteen, and from one Rod long to one hundred, to every half quarter of a Rod, both in breadth and length - - -

1

TABLE II.

Shews the Expence of Workmanship of any Quantity of Land, from one Perch to one Acre, and from two Shillings to ten Shillings per Acre - - -

122

TABLE III.

Shews the Value of any Number of Perches from one Perch to forty, and from fifteen Shillings to fifteen Pounds per Acre - - -

132

NEW TABLES.

TABLES,

Shewing the Expence of threshing from one to twenty Quarters of Corn, &c. by a gradual Rise of one Penny, from one Shilling to four and six-pence per Quarter. Together with the Price of the odd Bushels at each respective Price per Quarter - - -

140

T A B L E S,

PAGE.

For the several Kinds of Workmanship done by the Hundred, shewing the Value of the smaller Numbers at any given Price per Hundred, viz. beginning with one Shilling, and by a gradual Increase of three-pence, to four and six-pence per Hundred - - - 148

T A B L E S,

For sowing Corn, &c. in Drills or Furrows, shewing the Distance in Rods, Feet, and Inches, that a Gallon of Corn should sow, allowing any Quantity of Seed, beginning with one Bushel, by a Gradation of Pecks to eight Bushels per Acre.—Allowing the several intermediate Number of Furrows between seven and twenty to a Rod in Width - - - 152

T A B L E S

Of Long Measure, and Square Measure - - 157

T A B L E S

Of Land Measure, and Wool Weight - - 158

T A B L E

Of Wages or Expences, by the Day, Week, Month and Year - - - 159

T A B L E

Of the Sun's Rising every Third Day in the Year 160

EXPL

EXPLANATION of the following TABLE.

First. **A**T the Top of each Page stands the breadth, beginning at one Rod, and increasing by half quarters to sixteen.

Secondly. At the Left Hand of each of the four columns under L. stand the whole Rods in length, beginning at one Rod and ending at 100, and against each length, under A. R. P. is the Content, in Acres, Roods, and Perches.

Thirdly. At the Bottom of each Page stand the quarters and half quarters in length.

Fourthly. Observe, that, when the Area or Content comes to more than half a Perch, it is set down for a whole Perch; but if it comes to half a Perch or less, it is cast away, as insignificant.

Example I. A Cant, or Piece of Land, 4 Rods and a half broad, and 48 Rods long; what is the Content?

First find the breadth at the Top of the Page, and then look for 48 (the length) which you will find in the second Column under L. and right against it under A. R. P. is 1 A. 1 R. 16 P. that is, one Acre, one Rood, and sixteen Perches, the Content required.

Example

Example II. A Cant, six Rods and half quarter in breadth, and 73 Rods and three quarters long; what is the Content?

Having found the breadth, at the Top of the Page, look under L. for 73, and against it is 2 A. 3 R. 7 P. and the three quarters in length you will find at the Foot of the Page is 5 Perches, which added to the former, makes 2 A. 3 R. 12 P.

Example III. What is the Area or Content of a Piece of Land 12 Rods broad, and 27 Rods, one quarter and half quarter long?

Having found the breadth, at the Head of the Page as before, look for 27, and against it is 2 A. 0 R. 4 P. and the quarter and half quarter in length you will find at the Foot of the Page is 4 Perches, which added to the other, makes 2 A. 0 R. 8 P.

N. B. The Dimensions being taken to quarters and half quarters, and nothing set down less than a Perch, a great many of these Areas, or Contents, are either a little more or a little less than the exact Truth; and therefore in adding two Numbers together, (as in these last Examples) if one happen to be more and the other less, they are very near the Truth, and sometimes exactly true. And if one Number be true, and the other more or less, it cannot be above half a Perch too little, or too much; but if they should chance to be both more, or both less; it may possibly so fall out as to make near a Perch too little, or too much; and if so, the Difference will seldom be more than half a Perch.

And although these Tables run but to 16 Rods broad and 100 long, yet if it was required, the Area or Content of
any

any large Piece of Land may easily be found, by taking the breadth or length, or both, out twice or thrice, &c.

Example IV. What is the Area or Content of a Field, that is 28 Rods broad and 52 Rods long?

For the breadth take the half of 28, which is 14, and then against 52 (the length) is 4 A. 2 R. 8 P. and that doubled is 9 A. 0 R. 16 P.

Example V. Suppose a Field was 46 Rods and a half broad, and 73 Rods long, what is the Content?

Answer. 21 A. 0 R. 34 P. which, take out thus;

BREADTH.	A.	R.	P.
16	7	1	8
16	7	1	8
14 $\frac{1}{2}$	6	2	18
46 $\frac{1}{2}$	21	0	34

Suppose it was required to find what length or breadth will make an Acre (one being given). First find an Acre on the given breadth, or against the given length; and if you cannot find an exact Acre, yet you may find something very near it.

Example I. What length will make an Acre, at 7 Rods and a half broad?

Having found the breadth; look for an Acre, which you will find against 21 Rods, quarter and half quarter in length, viz. against 21 Rods long is 0 A. 3 R. 37 P. and against quarter and half quarter in length is 3 Perches, and therefore if the breadth be 7 Rods and a half, the length (to make an Acre) will be 21 Rods, quarter and half quarter.

Example

Example II. What breadth will make an Acre, at 28 Rods long?

Looking in several Pages against 28, I find that which comes nearest to an Acre is 1 A. OR. 1 P. and casting my Eye to the Top of the Page I find the breadth is 5 Rods and 3 quarters.

Example III. What breadth will make an Acre and a half at 67 Rods long?

Looking in several Pages against 67, I find that which comes nearest to an Acre and a half is 1 A. 2 R. 3 P. and the breadth I find (at the Top of the Page) is 3 Rods, half and half quarter.

Example IV. Suppose a Workman would take a Cant of 3 Acres, and you know the Field to be 55 Rods long, what must the breadth be?

Answer. Eight Rods and three quarters; which you may find as before.

The

The FARMER'S Harvest Companion.

One Rod in breadth.

Parts of a Rod in—Perches.

One quarter in length 4

Half - - - - 8

Three quarters - - 12

Half quarter in length 2

Quarter and half quarter 6

Half and half quarter 10

Three qrs. and half qr. 14

T A B L E II.

S H E W I N G

The Charge of Workmanship of any Quantity of Land from one Perch to an Acre, and from two Shillings to ten Shillings per Acre.

E X P L A N A T I O N.

ON every two Pages of this Table are 18 Columns; the first is Roods and Perches, and the other 17 are the Value thereof, in Shillings, Pence, and Farthings; at the several Prices per Acre, which stand respectively at the Head of each Column, beginning at 2s. per Acre and ending at 10s.

Example I. What is the Value of the Workmanship of 9 Perches at 4s. per Acre?

First find 9 P. in the first Column, and then guide your Eye across the Page till you come under 4s. in the sixth Column, and there you will find os. 2 $\frac{3}{4}$ d. the Value required.

Example II. What will 2 Roods and 5 Perches of Wheat cost to reap, at 5s. 6d. per Acre?

Against 2 R. 5 P. in the first Column, and under 5s. 6d. in the ninth Column, you will find 2s. 11d. the Value required.

Example III. What is the Value of one Rood and 36 Perches, at 8s. per Acre?

Having found 1 R. 36 P. in the first Column, guide your Eye across the two Pages till you come under 8s. and there you will find 3s. 9 $\frac{1}{2}$ d. the Value required.

And to hal

And although these Tables run but from two Shillings to ten per Acre, yet if it were required, the Value of any Quantity of Land may be found at Prices greater or less than are in these Tables, by doubling or taking the Price twice (or by taking two several Prices) when more, or by taking the Half of some certain Price, when less.

Example IV. What will 2 R. 16 P. of Hop-ground cost to dig, at 15s. per Acre?

Answer. Nine Shillings; for at 7s. 6d. per Acre (the half of 15s.) it comes to 4s. 6d. and that doubled is 9s. as before.

Example V. What will 3 R. and 11 P. of Corn cost to mow, at 1s. 3d. per Acre?

Answer. One Shilling and a Farthing; for at 2s. 6d. per Acre, it comes to 2s. 0½d. and the half of that is 1s. 0¼d. as before.

So likewise if the Price were 1s. 6d. you may take the half of 3s. per Acre: or if it were 2s. 9d. you may take the half of 5s. 6d. or if the Price were 4s. 3d. you may take the half of 8s. 6d. per Acre, and so after this Manner for any such Price. But if the Price be more than 5s. per Acre, with Three-pence or Nine-pence, it cannot be taken this Way; but then you may take some of the whole Prices and the half of another Price, as suppose 7s. 9d. per Acre, take first 6s. and then the half of 3s. 6d. and add them together.

N. B. When the true Value comes to more than half a Farthing it is set down for a Farthing, but if it comes to half a Farthing, or under, it is cast away.

T A B L E III.

S H E W I N G

The Value of any Number of Perches, from one Perch to forty, and from 15s. per Acre to fifteen Pounds, to every five Shillings.

E X P L A N A T I O N.

ON every Page are six Columns; the first is Perches, and the other five are the Value thereof, in Pounds, Shillings, Pence, and Farthings. At the Top, and in the Middle of each Page stand the Prices per Acre, beginning at fifteen Shillings and ending at fifteen Pounds.

Example I. What is the Value of eight Perches, at 1l. 10s. the Acre?

First find 8 Perches in the first Column; and then guide your Eye across the Page till you come under 1l. 10s. and there you will find 1s. 6d. the Value required.

Example II. What is the Value of seven Perches at 6l. 15s. the Acre?

Right against seven Perches and under 6l. 15s. you will find 5s. 10d. 3f.

Example III. What is the Value of 24 Perches at 12l. 10s. the Acre?

First find the Value of 4 Perches (as before) and then the 20, and add the Sums together, will make 1l. 17s. 6d. the Value required.

And

And although this Table goes no nearer than to every 5s. the Acre, yet if it is required, with the Help of this Table, and the foregoing Table of Money, you may find the Value of any Number of Perches (not exceeding 40) from 2s. the Acre to 15l. to every 6d.

Example IV. What is the Value of 10 Perches at 7l. 12s. 6d. the Acre?

First find the Value of 10 Perches at 7l. 10s. the Acre in this Table; and then look back into the other Table for 10 Perches at 2s. 6d. the Acre; add the Sums together, and you will find they will make 9s. 6 $\frac{1}{4}$ d.

Example V. What is 36 Perches of Wood worth at eight Guineas the Acre?

N. B. Here must be three Sums added together. First find the Value of 36 Perches at 8l. 5s. the Acre, by taking the 6 and then the 30; and then turn back to the other Table, and take the Value of 36 Perches at 3s. the Acre, and the three Sums together will make 1l. 17s. 9 $\frac{1}{2}$ d.

Example VI. What is the Value of 9 Perches at 13l. 18s. 6d. the Acre?

Answer, 15s. 7 $\frac{3}{4}$ d.

T A B L E S,

FOR THE

Several Kinds of Workmanship done by the Hundred,
 shewing the Value of the smaller Numbers at any
 given Price per Hundred, viz. beginning with One
 Shilling, and by a gradual Increase of Threepence,
 to Four and Sixpence per Hundred.

Note. From twenty to fifty it rises by fives, and
 from fifty to an hundred by tens.

T A B L E S,

For sowing Corn, &c. in Drills or Furrows,

S H E W I N G

The Distance in Rods, Feet, and Inches, that a Gallon of Corn should sow, allowing any Quantity of Seed, beginning with one Bushel, by a Gradation of Pecks to eight Bushels per Acre.—Allowing the several intermediate Number of Furrows between seven and twenty to a Rod in Width.

T A B L E S

For sowing Corn, &c. in Drills or Furrows.

Bushels per Acre.	EIGHT Furrows to the Rod.			NINE Furrows to the Rod.			TEN Furrows to the Rod.

T A B L E Of LONG MEASURE.

3	Barley corns	-	make	1 Inch
12	Inches	-	—	1 Foot
3	Feet	-	—	a Yard
3	Feet 9 Inches	-	—	an English Ell
6	Feet, or 2 Yards	-	—	a Fathom
5½	Yards	-	—	a Rod, Pole or Perch
40	Rods, Poles, or Perches	—	a Furlong	
8	Furlongs or 1760 Yards	—	a Mile	
3	Miles	-	—	a League
60	Miles or 20 Leagues	—	a Degree	

N. B. 60 Miles are here said to make one Degree, but very nearly 69½ Miles make but one Degree; so that the Globe of the Earth is about 25,000 Miles round.

✂ This Measure contains Lengths only.

T A B L E Of SQUARE MEASURE.

144	Square Inches	-	make	-	a Square Foot
9	Square Feet	-	—	-	a Square Yard
30¼	Square Yards	-	—	-	a Square Pole
40	Square Poles	-	—	-	a Square Rood
4	Square Roods	-	—	-	a Square Acre
640	Square Acres	-	—	-	a Square Mile

✂ This Measure contains Length and Breadth.

TABLE Of LAND MEASURE.

5½ Yards or 16½ Feet	make	{ 1 Rod, Pole, or Perch
40 Rods, Poles, or Perches	—	1 Furlong in length
40 Rods in length and 1 in breadth	} —	{ 1 Rood or Quarter of an Acre
40 Rods in length and 4 in breadth	} —	1 Acre
160 Rods in length and 1 in breadth	} —	1 Acre
80 Rods or Poles in length and 2 in breadth	} —	1 Acre
4 Roods or Quarters	—	1 Acre

N. B. The Chain for measuring Land, is divided into 100 Parts or Links; containing 4 Rods, or 22 Yards in Length; 10 Chains in Length and 1 in Breadth make an Acre. 80 Chains in Length only, make a Mile.

TABLE Of WOOL WEIGHT.

7 Pounds	-	make	-	a Clove
2 Cloves	-	—	-	a Stone
2 Stones	-	—	-	a Todd
6½ Todds	-	—	-	a Wey
2 Weys	-	—	-	a Sack
12 Sacks	-	—	-	a Last

Dec.	8 3	8 6	8 7	8 10	8 11	8 12	8 13	8 13	8 12	8 11

To find the Sun's Setting, subtract the Rising from 12.
For the Length of the Day, double the Setting; for that of
the Night, double the Rising.
